

Finds from the 1967 digs, and geophysical plots of sites on Steventon Road

Exploring Roman Hanney

William Wintle

We explore some of our neighbourhood's earliest history, when William Wintle goes 'Exploring Roman Hanney'! His talk will start by looking at some significant pre-Roman (Iron Age) sites and then cover the excavations at Marcham/Frilford, probably the most important Roman site in the Vale. Agricultural workers significantly outnumbered legionaries!

We will then move on to Roman activity and settlement in East Hanney, with a survey from 1967 and more recent development-led excavations such as the one south of Summertown.

Finally, we will tread in more turbulent water with a discussion of the long held "belief" that the A338 was itself a Roman Road.

Roman farming technology, in a panel from Trier
