

## **Test Pits, Local Archaeology, and an Apple Tree**

**Paul Sayers & Bill Orson**

**Test pits have recently helped several local villages re-evaluate their past. They offer the Hanneys an opportunity to do the same and can bring pleasure and unexpected benefits. The speakers managed a little of this in a Hanney garden in March and offer some hints to others who wish to follow their early steps during this brief introduction to the topic and news from some local results.**

**At our 2018 AGM Paul looked at recent archaeology in Hanney, which was appreciated by members. At tonight's meeting he will review the last 10 years of Development-led archaeology in the wider Wantage area. What was learned from the plethora of local building sites and other excavations?**

**The meeting concludes with this year's A.G.M. including our 2019/20 financial review.**

# **Hanney History Group**

**8.00 P.M**

**TUESDAY 27<sup>TH</sup>**

**OCTOBER**

**War Memorial  
Hall**

**East Hanney**

**OX12 OJL**
